Include

Asking for the permissions (in our case, album and photos user access)

Sing in via Facebook

Fetch album and display them as Grid list (2 albums per row), stored by name.

In order to fetch the albums (albums ids and names in our case) a graph request is placed within the onSuccess method in the MainFragment fragment.

We fetch the albums Photos via the fetchPhotosFromAlbumId method inside GridViewActivity in the albums folder.

Fetch albums images and display them

Selected images should be uploaded to the server via the methods that I put inside the Loading_ images_to_Server_Code folder.

Upload selected images to the server
